What is The Poudre Runs Through It Study/Action Work Group?

The group comprises approximately 25 citizen experts who represent a diversity of interests throughout the Poudre River Watershed -- agricultural, urban, environmental -- selected to study the Poudre River and formulate cooperative actions based on what they learn. They have been meeting since 2012 to build relationships and to put in action the initiatives they have identified, "to make the Poudre River the world's best example of a healthy working river." Hosting the annual Poudre River Forum is a great example. [Learn more at prti.colostate.edu/index.shtml](http://prti.colostate.edu/index.shtml)
